Health Topic-Elder Abuse

Elder Abuse Awareness

What is Elder Abuse?

Elder Abuse is any action by someone in a relationship of trust that results in harm or distress to an older person. Neglect is a lack of action by that person in a relationship of trust with the same result. Commonly recognized types of elder abuse include physical, psychological and financial. Often, more than one type of abuse occurs at the same time. Abuse can be a single incident or a repeated pattern of behavior.

Financial abuse is the most commonly reported type of elder abuse.
